

"As a dermatologist who strives to provide her patients with the best results possible, I'm always looking for the most advanced ways to enhance a patient's final outcome. After CoolSculpting®, I like to use ZWave instead of a traditional massage by hand to more accurately break up the cells and area treated. The ZWave is much more thorough when it comes to evenly distributing results across the treated area."

Kimberly Butterwick, MD
Dermatologic Surgeon
La Jolla, CA

"Our company philosophy is very simple: Provide the best product with the best service."

"Of the many devices in my aesthetic center, I would strongly recommend ZWave as a complement to enhance the results of an integrated aesthetic practice... My clinical research with this device supports our observed outcomes."

Gordon H. Sasaki, MD, FACS
Aesthetic Plastic Surgeon
Clinical Professor
Pasadena, CA

"The company was founded over 50 years ago with a single emphasis on quality and customer service. More than 50,000 Cryo unit sales later, nothing has changed in that regard."

Armin Zimmer

Unsurpassed
service

"I use eight Zimmer Cryo 6 units in my cosmetic laser dermatology office. Zimmer's Cryo devices ensure that my patients will experience minimal pain during their dermatologic surgery procedures. The Cryo devices also ensure that the epidermis is protected from thermal damage during laser procedures. I am extremely satisfied with the Zimmer Cryo units and service when in the extremely rare instance they malfunction. The Cryo devices distinguish my office and the services that we are able to offer our patients."

Mitchel P. Goldman, MD
Cosmetic Laser Dermatology
San Diego, CA

"We use the Z Wave after Cryolipolysis® on all of our patients. We believe that the uniform resultant immediate warming of cells is superior to hand massage and is well tolerated by patients. The mechanism of action is presumably more rapid heating of adipocytes, resulting in a higher population of demise. We also have not had any patients complain of significant postoperative pain since starting this method; we probably had at least one per week prior to this time."

Amy Taub, MD
Advanced Dermatology
Chicago, IL

Enhanced Body Contouring

Clinicians have reported that the use of Z Wave^{Pro} in conjunction with body contouring procedures has provided a more uniform and consistent massage effect than traditional hand massage.

Z Wave treatment after CoolSculpting[®]

"Our 2016 CoolSculpting[®] revenue was the best we had for the past few years. In spite of increasing CoolSculpt competition in the area, our business more than doubled from 2015 to 2016 since we added Z Wave. It was Z Wave that helped us stand out with a competitive advantage in our marketplace."

- Steven Weiner, MD
Facial Plastic Surgeon
Santa Rosa Beach, FL

Cellulite treatment and enhanced body contouring

Cellulite Treatment Before & After

Pictures below show an example of 10 treatments within 3 weeks.

"We added Z Wave to our CoolSculpting[®] practice as we knew it would both reduce pain and increase treatment efficacy. I was pleasantly surprised to see how many of our patients are enjoying its results as a stand-alone treatment for cellulite. It's really the first cellulite reduction system that has delivered consistent results in our hands... I appreciate that Zimmer doesn't incorporate consumables or cards so the Z Wave literally paid for itself in its first months."

- Ross Kaplan, MD
Coastal Dermatology
Camarillo, CA

Zimmer Medizinsystems Cryo 6 and Cryo Mini devices are intended to minimize pain and thermal injury during laser and dermatological treatments.

Unlike other cooling methods, such as contact cooling, cryogen spray or ice packs, the Cryo 6 and Cryo Mini can be used to cool the epidermis before, during and after the laser energy has been applied, without interfering with the laser beam.

Cold air treatment is also applied for temporary topical anesthetic relief for injections.

Skin cooling with cold air increases patient comfort during laser treatment, IPL applications and injections.

Skin cooling with cold air

"Achieving excellent aesthetic results is always a primary goal. However, if I can do it in a way that maximizes the comfort of my patients, it is ideal ...RF with Zimmer Chiller makes this possible."

Evan Ransom, MD
San Francisco Center for Facial Plastic, Reconstructive & Laser Surgery
